MultiTenant Access Control Telephone Based Intercom

The Multiphone MT-88 is a fancy anti vandal encoder for apartments building, gated communities etc.

The main advantage of the system is that you don't need any wires for the unit as it works as a telephone and makes an actual calls.

The system is suitable for any area that don't have infrastructure and need an intercom system to communicate

The system can store up to 99 numbers.

An English friendly LCD display guides the user when searching for a particular apartment number or family name.

The system provides an excellent sound quality and an availability for color camera.
